

POTENTIAL HAZARDOUS WASTE SITE
PRELIMINARY ASSESSMENT

NJPO58117979

Browning - Ferris Industries184Site NameSite ID Number714 Division StreetElizabeth, Union County, NJAddressCity, StateDate of Off-Site Reconnaissance March 7, 1985SITE DESCRIPTION

The facility operated as a hazardous and municipal waste transfer station until November of 1982. In December 1982 the facility was closed and decontaminated. The closure plan was approved by the NJDEP on December 12, 1983, and the facility was subsequently delisted as a TSD facility by NJDEP and EPA. The facility, however, has retained its permit to operate a solid waste transfer station. Available information did not state when and if this activity would commence.

During off-site reconnaissance the facility appeared to be inactive. Several dumpsters were noted in the area and one was being filled with municipal garbage, apparently as a cleanup operation. Additionally, a "for rent" sign was posted.

PRIORITY FOR FURTHER ACTION: High Medium Low X None

RECOMMENDATIONS

An inspection on a time-available basis is recommended to classify current activities and determine site status.

Prepared by: Gary VaccaroDate: March 28, 1985Of: JRB Associates

December 12, 1983

Mr. Peter A. Leonardis, District Manager
Browning-Ferris Industries, Inc.
714 Division Street
Elizabeth, NJ 07207

RE: Delisting of Browning-Ferris Industries, Inc. as a Hazardous Waste Facility, EPA ID NO. NJD05817979

Dear Mr. Leonardis:

The Bureau of Hazardous Waste Engineering has reviewed your request, which is contained in your letter dated October 21, 1983, that Browning-Ferris Industries Elizabeth Transfer Station be removed by both EPA and NJDEP from the list of interim status TSD facilities. The reason given for the delisting request was that cleaning and decontamination activities were carried out at the referenced facility during December 1982 after all operations had ceased the previous month.

The cleaning and decontamination procedures in effect became a closure plan for the facility. You certified in your letter of October 21, 1983 that the BFI Elizabeth Transfer Station was closed in accordance with the decontamination procedures. Also, a report by M. Disko Associates, Consulting Engineers certified that the closure plan for the referenced facility was performed as presented in your letter.

Therefore, this Bureau has determined that your company's hazardous waste treatment, storage or disposal facility as delineated in the company's RCRA Part A application and identified by EPA ID NO. NJD05817979 has been excluded from regulation under N.J.A.C. 7:26-1.1 et seq. because your facility no longer handles hazardous waste at the site and has closed the BFI Elizabeth Transfer Station according to a DEP approved closure plan.

This written acknowledgement of the exclusion of the above identified facility from N.J.A.C. 7:26-1 et seq. is based expressly on the review of the aforementioned correspondence. This letter makes no claim as to the extent and physical condition of the actual hazardous waste activities occurring at the site mentioned above. To operate a hazardous waste facility without prior approval from the DEP is a violation of the Solid Waste Management Act N.J.S.A. 13:1E-1 et seq.

A

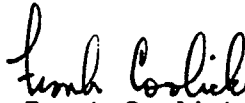

A-1

December 12, 1983

As a result of the conclusions previously made, this Bureau is of the opinion that the Notice of Violation: Failure to Establish Financial Assurance for Closure and Post-Closure and to Demonstrate Financial Responsibility for Claims dated August 31, 1983 and signed by Mr. Daid Shotwell has been satisfactorily complied with.

If you have any further questions on this matter, please contact Mr. Benjamin Esterman of my staff at (609) 984-4061.

Very truly yours,

Frank Coolick, Chief
Bureau of Hazardous Waste Engineering

MEMO

TO Vince Krisak and File
FROM Wolf Skacel through Fred Slickels DATE October 22, 1984
SUBJECT BFI - Elizabeth

On October 11, 1984 at 14:15 hours I met with Peter Leonardis, BFI - Elizabeth District Manager. The purpose of my visit was to determine through site inspection what if any TSD activity was being done on site. Mr. Leonardis states that he has not operated as a TSD since November 1982. Their closure plan was submitted and approved by Frank Coolick on December 12, 1983. Linda Zaninelli made periodic site inspections while their closure plan was being implemented. M. Disko Associates Consulting Engineers certified completion of BFI - Elizabeth TSD closure. Mr. Leonardis states that he has shown all this to Bill Zavacky on September 28, 1984 who subsequently recommended delisting BFI as a TSD.

I was taken to the former site of the TSD. It is an elevated, approximately 100' X 100' 3-sided building. The area was clean, and compactors which had previously been used were removed. Mr. Leonardis states that BFI has no interest in TSD activities at this site. [Their future plans for this area are dependent upon closure of the ILR Landfill.] If required to go to Ocean County for landfilling they will modify the building and use it as a staging area for their transfer station. I secured site at 15:00 hours.

I recommend that BFI - Elizabeth be delisted.

*George -
Please follow through BFI
See that Vince gets
to delist.*

Summary of Findings

Facility Description and Operations

This facility is no longer operating as a hazardous waste transfer station, it ceased transferring hazardous waste in November 1982. The site was decontaminated in December 1982 as outlined in the H&E approved closure plan. (See attachment #3.)

The B & A Company requested the facility be delisted on both the State permit and the Federal EPA permit. (See attachment #1.)

The delisting request was granted by N.J. H&E on 12-12-83. (See attachment #2.)

Division Of Waste Management
32 East Hanover Street
Trenton, New Jersey 08625

Attn: Mssrs. Ernie Kuhlwein and Asghar Aii Chaudhry

Dear Mssrs. Kuhlwein and Aii Chaudhry,

At our previous meeting on September 9th I indicated that the status of this company's hazardous waste facility (a transfer station) was under review by our upper management at both the regional office and national office.

If you will recall I stated that the facility has been in-operative since late in the year 1982. Also that in December of 1982 the facility was closed and decontaminated according to a previously submitted *Closure Plan*.

The closure and decontamination was executed under the supervision of M. Disko & Associates Consulting Engineers.

The closure activity was observed by Ms. Linda Zinanelli, a N.J. D.E.P. Inspector, who has also inspected the site up to the present time.

M. Disko & Associates has prepared a formal report which documents the closure and decontamination activity. The report contains copies of inspection checklists made by Ms. Zinanelli. It is signed and sealed by Michael Disko, Ph. D., a state licensed professional engineer.

A copy of the report which is formally entitled *Closure Plan Activities And Decontamination Certification At The Elizabeth Transfer Station* is attached hereto and is provided for your files.

C-1

Subsequent to December 1982 and up to this date the company has not operated the hazardous waste facility. However the permit (number 2004 F) has been kept in an "active status" by paying the quarterly fees.

Browning-Ferris Industries has decided that the hazardous waste facility does not have any future viability. Therefore by virtue of this letter it is hereby requested that the facility be "de-listed" and that both the state N.J.D.E.P. permit (2004F) and the Federal E.P.A. permit (NJD 058117979) be rescinded.

Pending receipt of a letter confirming that the permits have been rescinded, the company will remit any fees charged.

Also, upon your certification of the company's closure application would you please send me a letter stating that the facility has been closed in accordance with all New Jersey regulations.

Either within the above letter or by some other written form would you formally dismiss the NOV issued on August 31, 1983 for *Failure To Establish Financial Assurance For Closure And Past-Closure And To Demonstrate Financial Responsibility For Claims*. As you may recall it was agreed under the circumstances that (1) the facility was already closed and all costs paid, (2) the site is certified to be decontaminated and will not have any past-closure costs, and (3) the permit is being relinquished the NOV becomes an "academic matter". The company wants the dismissal so it can formally close its files.

Finally, please be advised that another permit (#2004A) for a solid waste transfer station will be retained by the company. The action on 2004F should not impinge in any way on the other permit number.

Thank you for assisting me in this matter. If you need additional information, please call or write me.

Sincerely yours,

Browning-Ferris Industries Of
Elizabeth, N.J., Inc.

Hazardous Waste Site DossierI. Site Name

Browning-Ferris Industries
714 Division Street
Elizabeth, New Jersey

II. Background to Investigation and Source of Initial Referral

Site identified during investigation of the Browning-Ferris landfill in South Brunswick, New Jersey.

III. Site Description

The facility is actually a transfer station which consists of an office building, garage, trash transfer building, compactor, and a large storage yard which is used to store roll-off containers and sludge boxes. Registered with NJDEP as facility number 2004A, the transfer station handles municipal, as well as chemical hazardous wastes. Municipal wastes are disposed of at local landfills and the hazardous wastes are allegedly shipped to Baltimore, Maryland for disposal.

The facility is located in an industrial area and there appears to be no threat to groundwater or water supplies. Storm sewers on site, however, may be carrying polluted runoff into nearby water bodies (Newark Bay and Arthur Kill). This problem does not appear to be significant.

IV. Allegation of "Imminent Hazard" Pollution

The facility has been cited by NJDEP for allowing chemical sludges to be stored too close to the municipal waste area. The DEP alleges that the sludges were mixing in with the municipal wastes and as a result were being disposed of at landfills not authorized to accept chemical wastes. NJDEP also alleges that the sludge pile was located too close to storm sewers which could during heavy rain receive leachate from the sludge pile.

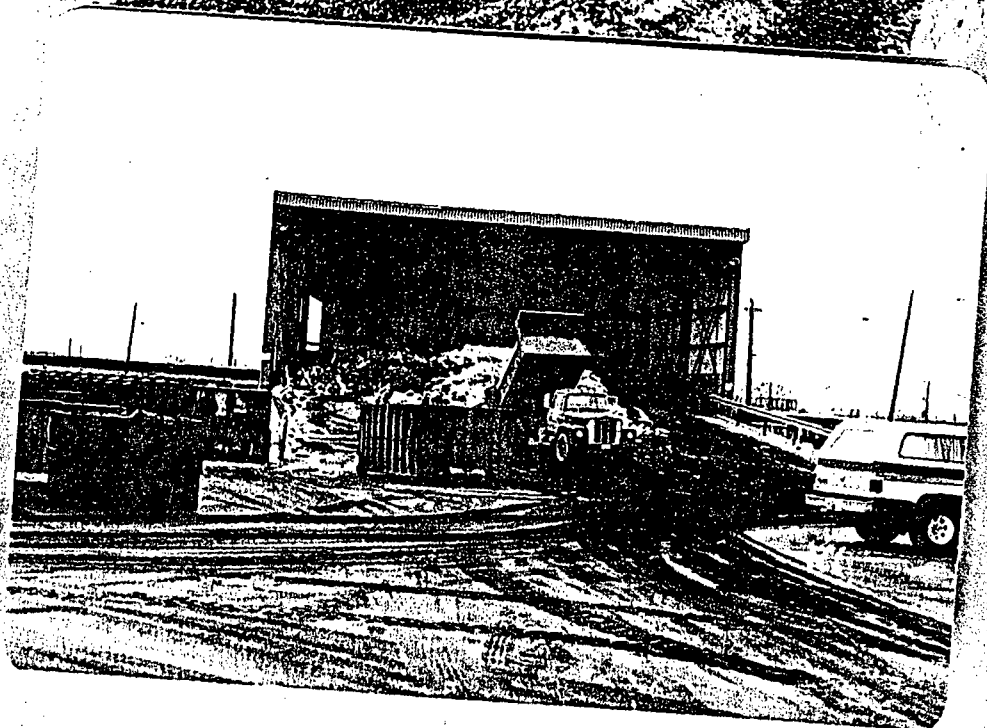

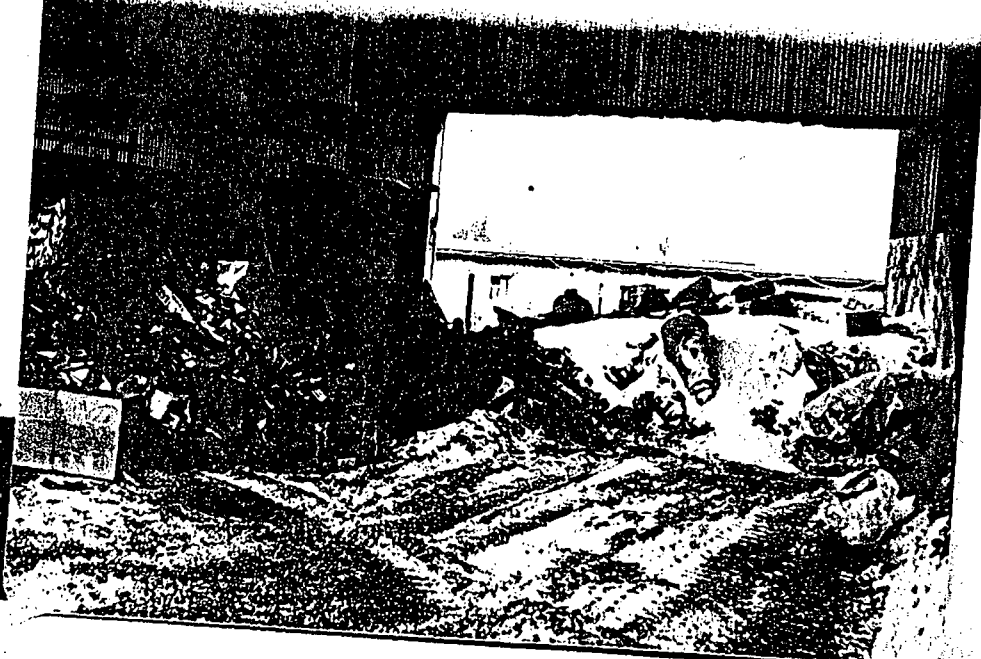

V. Current Involvement

In November, 1979, NJDEP requested that a special area away from the municipal waste area and storm sewer be designated for storage of chemical wastes. Browning-Ferris is currently in the process of complying.

VI. Information Still Needed

EPA should make a site visit to the facility to determine if acceptable methods are being practiced. If so, we should allow the State to continue managing the situation.

Observations and/or Other Comments 1) Manifests pointed by star are hand written,

others are filled out properly.

2) Incoming stream waste log is completed to 5/11/81 however not typewritten.

3) Unloading area was clean, not in operation, we inspected it during heavy rain and noticed that roof is badly leaking. So roof repair is recommended.

BFI. 5/11/81

Observations and/or Other Comments

- 4) On non hazardous side of loading area there was container and pile of waste from Exxon.
- 5) Request was made to obtain a copy of a BFI analysis of a load of contaminated soil from Robert Recovery Service, Lincoln. Material came from crude tank farm and lagoon at S.K.D. A copy of the BFI analysis, dated 7/31/80 was seen. Material contained 75% dried paint sludge and 25% dust. I requested a copy of the analysis and was told by Jim Goodkin that it was company policy not to release this information. I informed Mr. Goodkin that item 11a of the TOA states that typewritten duplicates of analyses are to be maintained ^{on file} and supplied to DEP representatives upon request. Mr. Goodkin translated this to mean that we can have a copy of analysis but a copy will not be given to us. I then contacted Dave Pith of our office who then spoke to Mr. Ralph Pascini about this. According to Mr. Ralph Pascini this item 11a means that a copy is to be supplied ~~to the DEP Rep.~~ to the DEP Rep. and that copy is to be given to DEP Rep. to be included in his report. It does not mean that DEP Rep. is only allowed to "see" analyses. According to Mr. Goodkin he would still not release a copy of analysis and it would be up to BFI attorneys to determine in court what should be released.

This is a violation of item 11a of TOA
